High-Flow, Manual Gas Pressure Regulators

HF Series

- Compact size with flow rates up to 200 std L/min
- Maximum inlet pressures up to 500 psig (34.4 bar)
- Manually adjustable outlet pressure up to 150 psig (10.3 bar)
- 316L VIM-VAR stainless steel body for ultrahigh-purity applications
- 1/4 in. VCR® metal face seal, 1/4 in. tube butt weld, and modular surface-mount end connections
Features

The Swagelok® HF series manual gas pressure regulator features a load spring which interacts with a unique pressure-sensing assembly to precisely control outlet pressure. Outlet pressure is adjusted by turning the handle.

Four interchangeable, color-coded load springs provide outlet pressures ranging from vacuum to 150 psig (10.3 bar). The load spring can be changed easily and safely without the potential of contaminating the high-purity system.

A matching label on top of the handle shows the pressure range of the installed spring. See the Operating Range table on page 3 for the outlet pressure range for each load spring.

Compact, High-Flow Design

- Allows close spacing of system components and process lines
- Modular surface-mount regulator is IGC™ compatible
- Offers flows up to 200 std L/min

Adjustable Outlet Pressure Ranges

- Available in outlet pressures ranging from vacuum to 150 psig (10.3 bar)
- Allow changing the range without affecting system integrity

Innovative, Pressure-Sensing Assembly

- Includes welded diaphragm and unique stem assembly
- Results in low droop, which eliminates the need for adjustment in many systems
- Allows maximum rated inlet pressure applied to the outlet without damage

High-Purity Design

- Achieved with tied poppet for positive shutoff and metal-to-metal seal to atmosphere
- Features 316L VIM-VAR stainless steel body internally electropolished and finished to 5 μin. (0.13 μm) $R_a$
- Available with a choice of Swagelok ultrahigh-purity processing (P) or Swagelok special processing (P1)

Self-Centering Poppet

- Minimizes creep
- Offered in PCTFE for leak-tight shutoff

Narrow-Profile Handle

- Permits easy access for pressure adjustments when system components and process lines are closely spaced.
- Designed with both a finger-tip grip and knurled diameter for positive actuation.

- 2.78 (70.6) short gland
- 0.44 (11.2)"
High-Flow, Manual Gas Pressure Regulators

Ordering Information
To order a complete assembly, order a regulator and a spring kit. Regulators are stocked with narrow-profile blue nylon handles and without spring kits.

Body Material
316L VIM-VAR stainless steel

Model
HFM3B = inline
MSM-HFM3B = surface-mount

End Connections
VCR4 = 1/4 in. VCR short gland
VCR4L = 1/4 in. VCR long gland
BW4 = 1/4 in. tube butt weld
None = C-seal surface-mount (MSM-HFHM3B only)
① Swagelok VCR split-nut assemblies must be ordered separately. See below.

Process
P = Swagelok Ultrahigh-Purity Process Specification (SC-01); electropolished, $R_a$ 5 μin. (0.13 μm) average
P1 = Swagelok Special Cleaning and Packaging (SC-11); electropolished, $R_a$ 5 μin. (0.13 μm) average

Swagelok VCR Split-Nut Assemblies
Swagelok VCR split-nut technology offers:
- Flexibility of inventory
- Shorter end-to-end dimensions
- Rotatable, nonwelded end connections.

When ordering a regulator with VCR end connections, VCR split-nut assemblies must be ordered separately. VCR split-nut assemblies are field assembled. To order, select the ordering number for the male or female assemblies.

Options and Accessories

Factory-Installed Load Springs

Regulators can be ordered with a factory-installed load spring. To order, add the spring designator to the regulator ordering number.

<table>

</tr>
</tbody>
</table>

Example: SS-HFM3B-VCR4-P-A

Maintenance Kits

Poppet Kits

A poppet kit includes one poppet, poppet port seal, and installation instructions.

Ordering number: MS-3K-HFM3

Poppet Tool

A poppet replacement tool is needed for poppet installation.

Ordering number: MS-TOOL-HFM3

Aluminum Handles

Narrow-Profile Handle

The standard, narrow-profile handle is also available in aluminum with a choice of seven epoxy-coated colors.

To order a factory-installed narrow-profile aluminum handle on an HF series manual regulator, add the handle color designator to the regulator ordering number.

Example: SS-HFM3B-VCR4-P-BK

Low-Torque Handle

An optional six-lobed handle is available to provide a lower actuation torque on the HF series manual regulator. The low-torque handle is epoxy-coated aluminum and is available in seven colors.

The low-torque handle is suitable for use with the 20 to 150 psig (1.3 to 10.3 bar) spring kit.

The handle has a diameter of 2.00 in. (50.8 mm), as shown on page 4, and is not recommended for use with surface-mount valves.

To order a factory-installed low-torque aluminum handle, insert L and add the color designator to the regulator ordering number as shown.

Example: SS-HFML3B-VCR4-P-BK

Oxygen Service Hazards

For more information about hazards and risks of oxygen-enriched systems, see the Swagelok Oxygen System Safety technical report, MS-06-13.

Options and Accessories

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Caution: Do not mix or interchange parts with those of other manufacturers.

Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.
